your peace of mind.

HydroLink Plus®

ECOWATER WI-FI MONITORING OPTION

Wi-Fi Connected Conditioner/Refiner/Filter

The EcoWater HydroLink Plus® gives you the power to monitor your water usage, lets you know when to add salt and gives you peace of mind when traveling. Allowing you to log on to a website, receive an email or text notifying you of an issue with your system.

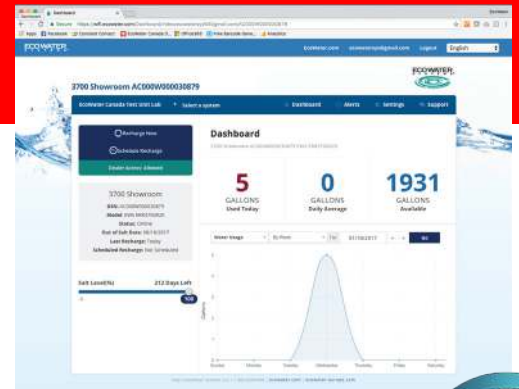

The HydroLink Plus® features the Wi-Fi connected board and allows you to receive email or text notifications. Once the unit is connected to Wi-Fi you will be able to view the system's status, register product to your dealer, and set up alerts.

Alerts and Features

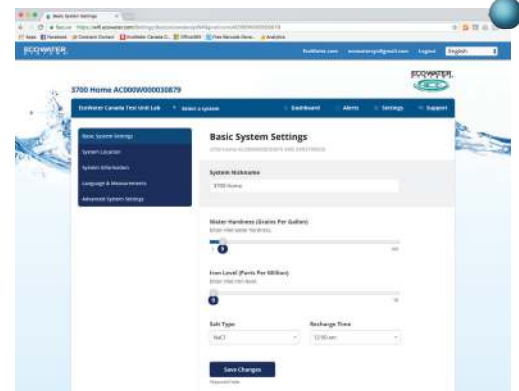

The following alerts will notify you with an email or a text if any of these conditions exist. Any combination or all of these alerts can be selected to give active notification.

- **Water-to-Drain Sensor*** – Notifies you when an excessive amount of water is going to drain.
- **Low Salt Warning** – An alert is displayed to let you know when salt needs to be added to the conditioner/refiner.
- **Flow Monitor** – Sends an alert if conditioned water has been flowing for an extended period of time. Both the duration and flow rate can be changed.
- **Water Meter** – Allowing for chemical feed dosing, flow switch operation and water use information.
- **Excessive Water Use** – Sends an alert if significantly more conditioned water has been used than average for your home.
- **System Error** – An alert is displayed to let you know that an error code condition exists on the unit.
- **Service Reminder** – An alert is displayed to let you know the unit is due for service.
- **System Connection Status** – Sends an alert to let you know that the Wi-Fi connection has been lost.
- **Regeneration/Backwash Start** – Regeneration can be started remotely from your dashboard to your conditioner/refiner. Backwash cycle can be started remotely from your dashboard to your filter.

*This feature is not yet available on water filters.
